Chimney Products

Birds nesting in chimneys can be a major problem and our range of chimney products are designed to deter the pest birds, preventing them from perching on your chimney pot and fouling the chimney stack with their guano.

Chimney pot **Mesh Balloons** are quick and easy to fit and whilst the birds can perch on top of these, it will stop them entering the chimney. It will also keep leaves and other small mammals out. They come in 3 different sizes depending on the size of the chimney.

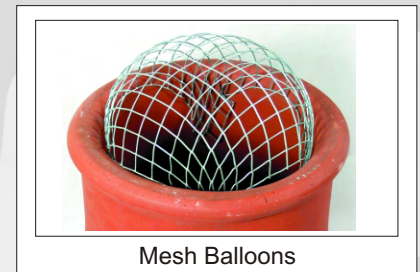

Decorative Chimney Guards are conical in shape and are ideal for stopping gulls, crows and pigeons from perching. One size fits all, 150mm - 225mm, they are easy to install and available in black and teracotta. The guards are made from steel and are powder coated.

Defender Chimney Guard is for use against seagulls perching nesting on or between chimney pots. It simply wraps around the top of any shape or size chimney pot. No tools or glue are required.

Chimney Spike is ideal for use against seagulls nesting on chimneystack. This is a heavy duty stainless steel spike system that is used to protect chimney pots and chimney stacks. It is made from 3mm diameter, grade 316 stainless steel rods, welded together. When fully erected the chimney spike will protect an area of approximately 400mm x 400mm. They can be placed in the pots, between the pots or in the "V" shaped area behind some chimneys to prevent nesting. They can be quickly removed for maintenance access.

Chimney Cappers are great for shutting off disused chimneys, to prevent birds from falling down. They are available in teracotta and buff,

Product No.	Description	Unit
CG055	Mesh Balloon 150mm (6") 1-3 units	each
