

Mesh Products

We stock high quality **Weldmesh** in a variety of mesh sizes and widths, for use against pest birds at any pressure level

Weldmesh is a rigid form of wire mesh netting made of square-shaped meshes welded together. It is easily cut using wire cutters and can be shaped to fit areas where other methods of proofing would not be suited.

Use to proof awkward entrances to voids where birds are perching, roosting or nesting. It is corrosion resistant, simple to use and looks neat and professional.

Chimney Cage made from Weldmesh

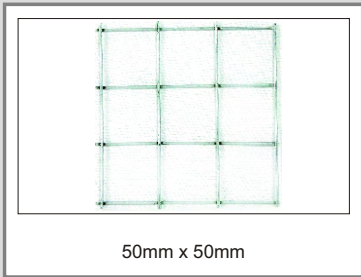

Weldmesh ???

Weldmesh clips are used to secure the mesh to metal, stone, concrete or brick surface..

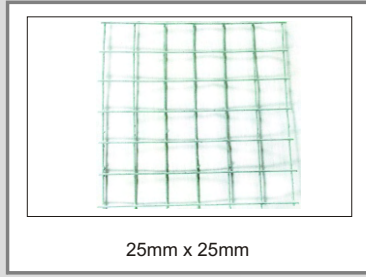

Our 50mm x 50mm mesh size is ideal for the protection of Seagulls and Pigeons. 25mm x 25mm is great for Starlings and 25mm x 12.5mm protects against Sparrows and other small garden birds.

We also supply **Wire Netting (Chicken Wire)** and **Rabbit Netting**, for a more cost effective solution, ideal for garden use to protect against small birds, it can also be used for aviaries, housing pets and game birds, with a mesh size of 25mm, 31mm and 50mm.
