

# Visual Deterrents

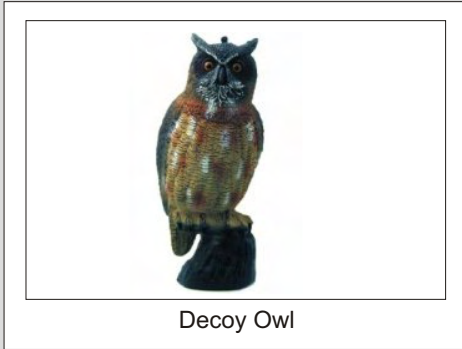

## Decoy Birds

Our visual Predator Decoys are great for scaring away pest birds

The **Prowler Owl** with a 4 foot wing span and the **Flying Kestrel** with a 56cm wing span move in the wind, to appear more realistic to the birds.

For maximum effect the birds need to be mounted as high up as possible, and silhouetted against the skyline. The static decoys should be re-located regularly to maintain their deterrent effect.

The **Heron** decoy is great for protecting your ponds. Place this beside the pond and as Herons are territorial birds if they see another one sitting beside the pond they will fly by..

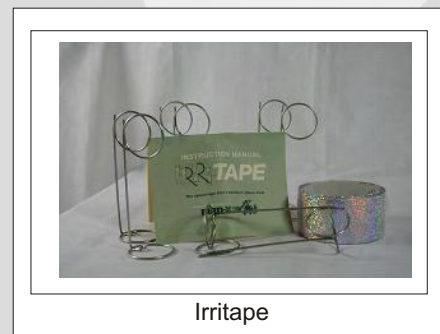

Product No.	Description	Unit
VD336	Decoy Owl	each
VD337	Prowler Owl	each
VD341	Peregrine Falcon	each
VD342	Flying Kestrel	each
VD343	Small Decoy Owl	each
VD344	Heron	each

## Other Visual Deterrents

**Terror Eyes** is a 2 foot diameter vinyl inflatable balloon, with lenticular eyes that produce holographic effects, constantly moving and changing. Ideal for use on balconies and on trees.

**Irritape** iridescent bird deterrent foil combines holography, wind and light to irritate pest birds' senses and create an "off limits" zone against them. Simply mount using the brackets provided, great for farms, gardens, boats and any outdoor areas. Available in 100' or 500' packs. They can also be used without brackets as streamers to protect lawn seed and crops.

Product No.	Description	Unit
VD338	Terror Eyes	each
VD339	Irritape 100'	each
VD340	Irritape 500'	each
